Steamed Caribbean lobster with quinoa and chile

Directions

1. Wash quinoa using a colander with cold water. Boil, following the package instructions, usually between 8 and 12 minutes. Drain and set aside.
2. Chop chile and chives. Combine with boiled quinoa. Dress with lemon juice, oil, and salt to taste.
3. Wash lobster and skewer with a long stick, from tail to head. The lobster will not curl and cooking will be easier.
4. Fill The SteamBox tray with water, place the glass lid, put in the oven, and preheat to 160°C.
5. When steam appears in The SteamBox tray, place The SteamBox grid inside and the lobster over it. Cover with the lid.
6. Bake at 160°C for 18 minutes.
7. Prepare a large bowl with ice and water. Add the lobster to stop the cooking process.
8. Clean the lobster with scissors. Peel and cut the tail. Save the eggs in the head for later and claws for other recipes or to serve separately.
9. Serve with quinoa salad, decorate with sprouts and, over it, the lobster tail.

Tips

You can use eggs of the lobster for a sauce. Emulsify an egg with salt, lobster eggs, lime juice, and olive oil. Add a few drops of tabasco for a hot touch. Reduce cooking time when lobster is smaller. For a 1,200 Kg lobster, 20 minutes is the right baking time. Check lobster during baking to avoid overcooking.

Ingredients (serves 4)

- 1 Lobster (1,200 Kg)
- 220 g Quinoa
- 1 Chile
- 4 Chives
- 1 Lime or lemon juice
- 50 ml Olive oil
